

# Knegt Electric Tractor

**Knegt Special Purpose  
compact Row Crop Tractor  
55 HP e-Tractor**

**Bigger Rims and Tires  
front 3-pt hitch  
Cat.2 pins**

**The red tractor that thinks GREEN**

## **Features**

### **Efficient and durable for all the tough farm jobs**

- Special Purpose electric 55HP Row Crop Tractor
- High ground clearance for general crop farming
- Working time of 3 to 5 hours per battery
- With the fast charger - from 30% to 80% in just 2 1/2 hours
- 1 Year Product Warranty
- Extra battery pack that can be carried in both front linkage and rear linkage
- 55 HP is equipped with 2 powerful electric motors (40hp and 15hp)
- Lithium Iron Phosphate Battery
- Four-wheel drive with diff-lock
- Larger diameter rims
- Larger Agriculture Titan International Tires
- Double-acting hydraulics
- Power steering and brakes
- Cat 2 rear 3 point hitch
- Air conditioning optional

## **Typical Applications / Uses for high clearance Compact Tractor**

### **Medium size Farm**

- Plowing
- Planting
- Cultivating crops
- Crop spraying
- Fertilizer applications
- Harvesting / hauling produce
- Handles big 4x5 round balers and TMR mixers
- Material Handling
- Livestock Feeding
- Barn & Stall Cleaning
- Lifting and moving heavy materials
- Snow removal
- General farm maintenance

### **Produce and Market Farming**

- Low noise level around employee's during transplanting and harvesting
- Short turning radius into rows or raised beds
- High crop clearance of any compact tractor
- With changeable batteries, ability to stay in the fields long hours
- Tractor doesn't have to idle during periods of stoppage for refills
- Front Battery pack is excellent counterweight for heavy rear 3 pt. attachments
- Full power at slow ground speeds
- Multi 540 and 1000 pto speeds
- Full vision cab for 360 degree of crops view and implements

### Construction:

- Front-end loader and backhoe
- Highway and road maintenance, mowing
- Light excavation and grading work
- Clearing brush
- Lifting and moving heavy materials
- Snow removal
- Operating time is sufficient for typical construction site operation
- Extra battery carried for storm maintenance work

#### Extra battery pack

To make the electric tractor even more appropriate, there is the option of an additional battery pack. This additional battery can be attached to the front or behind the hitch. During operation, the external battery is used first. Once empty, the battery can be quickly recharged using a charger. While the external battery is charging, you can continue working as usual thanks to the internal battery. By the time the internal battery runs out, the external battery is fully charged again and you can continue working. An additional battery pack extends your working time up to 9 hours.

## Specifications

### **SP 55HP (404G2E)**

Drive train .....	4WD	Battery .....	Lithium Iron Phos
Dimensions (LxWxH).....	383 x 161 x 230 cm	Capacity .....	350AH / 500A
	151 x 63 x 90 in	Charge Cycle .....	3.5
Rear axel width.....	140 cm ~ 55 in	Working time per battery.....	3 - 6 hours
Front axel width .....	120 cm ~ 47 in	Immediate top up .....	Yes
Wheelbase.....	181 cm ~ 71.3 in	Clutch type .....	Double
Rear axel clearance.....	45.72 cm ~ 18 in	Gearbox .....	4 + 4 x 2
